# INTRODUCTION

**We are committed to providing high-quality travel services  
around India**

Travello isn't just a travel agency; it's your digital gateway to explore the world's wonders from the comfort of your own home. Our web project seamlessly combines HTML, CSS, JavaScript, PHP, and MySQL to bring you a dynamic and interactive platform designed to inspire and assist in planning your next adventure. With our user-friendly interface and sleek design, navigating through our website is as easy as deciding where to go next. From browsing through exotic destinations to customizing your dream itinerary, Travello offers a comprehensive range of features to cater to every traveler's needs.

# PROBLEM STATEMENT

Many platforms lack interactive features such as surveys to guide users who are uncertain about their preferred destinations. hence leading to decision paralysis and a less engaging user experience.

Create surveys to enhance user experience & satisfaction understanding their preferences and requirements.

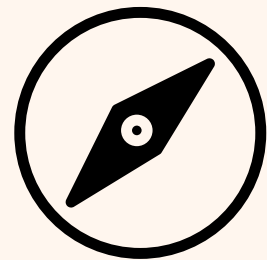

create a website targetting like minded group travellers to share common intrests in visiting unexplored places

Most of the existing tour agencys only have the obvious tourist places and nothing new to explore & adventurous

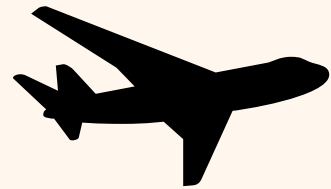

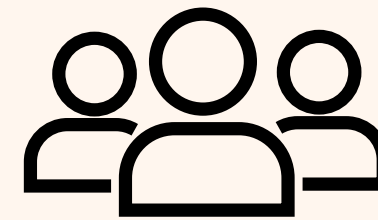

# OBJECTIVES

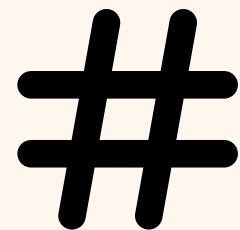

**PROVIDE SURVEYS**

**USER FRIENDLY INTERFACE**

**BRING TOGETHER LIKE-MINDED  
AND PASSIONATE TRAVELERS**

**OFF-THE-GRID DESTINATIONS**

**PROVIDING THE BEST ADVENTOROUS  
ITINERARY & TRAVEL GUIDES**

**EFFICIENT BOOKING SYSTEM**
